To Whom It May Concern

Alexander Iliev has been teaching engineering courses for UC Berkeley Extension for approximately 4 years. He has taught courses on Matlab, Accoustics, Audio Signal Processing, and most recently Python for Data Science.

I have worked with Iliev for two years and have found him responsive and a pleasure to work with. Student feedback on his teaching has also been good. Students often comment on his knowledge, enthusiasm, and helpfulness.

Based on my experiences with Iliev, I believe he would be an excellent candidate for an academic position at your institution. Please feel free to contact me should you need further information.

Best regards,
