

CONTENTS

Dedication – <i>Vasil Atanasov Popov</i>	iii
List of the scientific papers of Vasil Atanasov Popov	viii
Participants	xv
P. Binev, K. Jetter – Euler Splines from 3–directional Box Splines	1
J. Burkett, A. K. Varma – Lacunary Interpolation by Splines (0,1,2,4) case	9
B. Büttgenbach, P. Lünebach, G. Lüttgens, R. J. Nessel – Error Bounds for Compound Quadrature Rules in the Space of Riemann Integrable Functions	19
D. Castellanos, W. E. Rosenthal – Rational Chebyshev Approximations of Analytic Functions	31
Z. Ciesielski – Modulus of Smoothness of the Brownian Paths in the L^p Norms	71
C. Cottin – A Jackson–type Theorem on Approximation by Bounded Trigonometric Blending Polynomials	77
C. Cottin, H. H. Gonska – A Note on Global Smoothness Preservation by Boolean Sum Operators	85
G. Criscuolo, B. Della Vecchia, G. Mastroianni – Hermite Interpolation on Two New Nodes Matrices	93
F. J. Delvos – On Salzer's Approach to Trigonometric Hermite Interpolation	99
T. Dimov – Error Estimates of the Lowest Order Mixed Finite Element Method on Grids with Regular Local Refinement	105
K. A. Driver, D. S. Lubinsky, G. Petruska – Irregular Distribution of $\{n\beta\}$, $n = 1, 2, 3, \dots$ and Curious Basic Hypergeometric Series	115
D. P. Dryanov – Equiconvergence and Equiapproximation for Entire Functions	123
M. I. Dyachenko – Some Properties of Monotone Functions of Several Variables	137

D. Grozev, N. Vladov – On the Multivariate Spline Approximation in C -metric	143
H. P. Heinig, R. Johnson – Necessary Conditions for Fourier–Hankel Multipliers	157
I. Ivanov – On L_p -approximants and Meromorphic Continuation of Functions . . .	165
L. M. Kocic, S. D. Marinkovic – Triangular Constructive Algorithms .	173
D. S. Lubinsky, P. Rabinowitz – Hermite–Fejer Interpolation for Weights on the Whole Real Line	183
E. I. Milovanovic, M. K. Stojcev, I. Z. Milovanovic – Real–Number Codes for Fault–Tolerant Matrix Inversion on Processor Arrays	193
P. Oswald – On Discrete Norm Estimates Related to Multilevel Preconditioners in the Finite Element Method	203
G. M. Phillips – More Applicable Error Estimates for Quadrature Rules.	215
N. Popa – A Gamlen–Gaudet Type Theorem in the Unconditional Part of $L_\infty(0,1)$ with respect to Haar System	219
Q. I. Rahman, G. Schmeisser – Characterization of Functions in Terms of Rate of Convergence of a Quadrature Process III	235
K. Reczek, M. Simkani – On Rational Approximation of Meromorphic Functions	243
E. B. Saff, H. Stahl – Sequences in the Walsh Table for $ x ^\alpha$	249
B. Shekhtman – Some Simple Open Problems on Interpolation of Individual Functions	259
M. D. Takev – On the Theorem of Whitney–Sendov	269
R. Uluchev – Geometric Birkhoff Interpolation with Parametric Quadratic Splines.	277
H. Wallin – Self Similarity, Markov's Inequality and d -Sets	285
Z. Wronicz – On Approximation by Chebyshevian Splines.	299
S. B. Yakubovich, Y. F. Luchko – The Convolutional Method for the Constructing of Integral Analog of Leibniz Rule	307
