Contents

Part 1. Plenary Lectures

A Multivariate Analog of Fundamental Theorem of Algebra and Hermite Interpolation
H. A. Hakopian 1

Classical Polynomial Inequalities in Several Variables
A. Kroó 19

Nonlinear n-term Approximation from Hierarchical Spline Bases
P. Petrushev 33

Entire Functions of Exponential Type in Approximation Theory
D. P. Dryanov, M. A. Qazi and Q. I. Rahman 86

Greedy Type Bases in Banach Spaces
P. Wojtaszczyk 136

Orthogonal Expansions and Weighted Approximation on the Unit Sphere
Y. Xu 156

Part 2. Contributed Talks

On Some Properties of Orthogonal Polynomials over an Area with a Weight Having Singularity on the Boundary Contour
F. G. Abdullayev 178

The Complete Asymptotic Expansion for the Gamma Operators and Their Left Quasi-Interpolants
U. Abel and M. Ivan 184

Exact Jackson Inequality in L_2
V. V. Arestov 190

Wavelet Decomposition and Sampling for p-adic Multiresolution Analysis
N. D. Atreas 198

About Kolmogorov Type Inequalities for Functions Defined on a Half Line
V. Babenko and Yu. Babenko 205

On Kolmogorov Type Inequalities for the Norms of Intermediate Derivatives of Functions of Many Variables
V. Babenko, N. Korneichuck and S. Pichugov 209

Alternation Points in Rational Chebyshev Approximation
H.-P. Blatt, R. Grothmann and R. Kovacheva 213
Discrepancy Estimates and Rational Chebyshev Approximation
H.-P. Blatt, R. Grothmann and R. Kovacheva 219
New Nonexistence Results for Spherical Designs
S. Boumova, P. Boyvalenkov and D. Danev 225
On Martensen Splines
F.-J. Delvos 233
Analyticity of Moduli of Continuity
O. A. Dovgoshey and L. L. Potomkina 239
A New Modulus of Smoothness for Trigonometric Polynomial Approximation
B. R. Draganov 245
On the Disribution of the Zeros of an Entire Function of Exponential Type
D. P. Dryanov 251
Walsh-Fourier Series with Respect to Weights
T. Eisner 259
Localization of the Spherical Gauss-Weierstrass Kernel
N. L. Fernández and J. Prestin 267
Decompositions of Hilbert Spaces: Local Construction of Global Frames
M. Fornasier 275
A Quadratic Spline of Sendov Type
I. Gavrea 282
Refinable Quasi-Interpolatory Operators
L. Gori and E. Santi 288
Commutativity of Durrmeyer-Type Modifications of Meyer-König and Zeller and Baskakov-Operators
M. Heilmann 295
Jackson Order of Approximation by Riesz Means for Freud Weights
Á. P. Horváth 302
Convergence of Generalized Bernstein Polynomials Based on the q-Integers
A. Il'inskii and S. Ostrovska 309
A Pompeiu-Type Mean-Value Theorem and Divided Differences
M. Ivan and U. Abel 314

Characterization of Weighted K-functionals by New Moduli of Smoothness
K. G. Ivanov 320

Constructing Polynomial Surfaces from Vector Subdivision Schemes
K. Jetter and G. Zimmermann 327

On Estimations of the Norms of the Lagrange Interpolation Operators
K. Kitahara, F. Shimizu and Y. Udagawa 333

A Note on Simultaneous Approximation
U. Luther 339

Fast Evaluation of Discrete Integral Transforms by Chebyshev and Leja Polynomial Approximation
S. De Marchi and M. Vianello 347

An Algorithm for Recognition of Linear Surfaces
Ž. Mijajlović and D. Urošević 354

A Weighted Markov's Inequality on the Real Line
L. Milev 362

Vector Variants of Some Approximation Theorems of Korovkin and of Sendov and Popov
R. Păltănea 366

Properties of Discrete Rational Orthonormal Systems
M. Pap 374

Cubature Formulae for the Sphere and the Ball in $\mathbb{R}^n$
G. Petrova 380

Entropic Schemes for Conservation Laws
B. Popov 385

Orthogonal Product Systems of Rational Functions
F. Schipp 391

Majorization of Zeros of Polynomials
G. Schmeisser 397

Approximate Recovery of Functions and Besov Spaces of Dominating Mixed Smoothness
W. Sickel 404

Solving Equations by q-iterative Methods and q-Sendov Conjecture
M. S. Stanković, P. M. Rajković and S. D. Marinković 412

On Uniform Summability of Discrete (Interpolatory) Processes
L. Szili 419
Chebyshev Rational Functions
S. Tashev 425
Some New Integrability Classes of Fourier Coefficients
Ž. Tomovski 433
On a Conjecture of Polynomial Zeros
R. Uluchev 440
Scattered Data Interpolation in $\mathbb{R}^3$ by Smooth Curve Networks
K. Vlachkova 446
