

**BIBLIOGRAPHY**  
**of the works of Academician Bl. Sendov**

1956

- [1] On a class of regular functions. *Dokl. AN SSSR* **110** (1956), No 1, 27–30 (in Russian).

1958

- [2] On a subcone of the cone of the regular-monotone functions, the signs of the derivatives of which change periodically. *God. Sof. Univ. Phis.-Math. Fac.*, **50**, (1958), No 1, 109–120 (in Bulgarian).
- [3] On the expansion of the regular-monotone function in Goncharov series. *Dokl. AN SSSR* **118** (1958) No 3, 450–453 (in Russian).
- [4] On a type of regular-monotone functions. *Izv. Math. Inst. BAS* **3**, (1958) No 1, 89–104 (in Bulgarian).
- [5] A note on the theorem of Gauss for the distribution of the zeros of a polynomial on the complex plane. *Fiz.-Math. sp.* **1**, (1958) No 3–4, 169–171 (with T. Genchev, in Bulgarian).

1959

- [6] An integral inequality for algebraic polynomials with only real zeros. *God. Sof. Univ. Phis.-Math. Fac.* **53** (1959), No 1, 19–32 (in Bulgarian).
- [7] Symmetrical flow around circular cylinder with two vortices behind it. Trajectory of the vortices and resistance of the cylinder. *Dokl. AN SSSR* **128** (1959), No 1, 53–59 (with Bl. Dolapchiev, in Russian).
- [8] On some properties of the regular-monotone functions. *Izv. Math. Inst. of BAS* **3** (1959), No 2, 63–68.
- [9] The trajectory of a vortex pair behind a circular cylinder and its connection with the resistance of the cylinder. *Izv. Math. Inst. of BAS* **3** (1959), No 2, 213–243 (with Bl. Dolapchiev, in Bulgarian).

1961

- [10] The Theorem of Vahlen for singular continued fractions and continued fractions of the nearest natural number. *God. Sof. Univ. Phis.-Math. Fac.* **54** (1961), No 1, 251–258 (in Bulgarian).
- [11] On the equations in words. *Z. math. Logik Grundlagen Math. (Berlin)* **7** (1961), 289–297 (with D. Skordev, in Russian).

1962

- [12]  $\varepsilon$ -entropy and  $\varepsilon$ -capacity of the set of continuous functions. *Vestnik MGU* **17** (1962), No 3, 15–19 (with S. Dimiev and B. Penkov, in Russian).
- [13]  $\varepsilon$ -entropy and  $\varepsilon$ -capacity of the set of continuous curves. *Vestnik MGU* **17** (1962), No 3, 20–23 (with B. Penkov, in Russian).
- [14] Approximation of functions with algebraic polynomials in respect to a metric of Hausdorff type. *God. Sof. Univ. Phis.-Math. Fac.* **55** (1962), 1–39 (in Bulgarian).
- [15] Eine Aufgabe aus der Kombinatorik. *C. R. Acad. Bulgare Sci.* **15** (1962), No 1, 5–8.
- [16] Graphs, connected with mechanisms. *C. R. Acad. Bulgare Sci.* **15** (1962), No 2, 111–113 (with N. Martinov, in Russian).
- [17] Frequencies of Letters in Written Bulgarian. *C. R. Acad. Bulgare Sci.* **15** (1962), No 3, 243–244 (with B. Penkov and others).
- [18]  $\varepsilon$ -entropy and  $\varepsilon$ -capacity of the space of continuous functions. *Izv. Math. Inst. of BAS* **6** (1962), 27–50 (with B. Penkov, in Bulgarian).
- [19] Machines for education. *Sp. Mathematica, Sofia* **1** (1962) No 2, 32–35 (with B. Penkov, in Bulgarian).
- [20] Let us think on mathematics. *Sp. Mathematica, Sofia* (1962), No 1, 4–6 (with B. Penkov, in Bulgarian).
- [21] Rational zeros of algebraic equations. *Sp. Mathematica, Sofia* (1962), No 1, 27–30 (in Bulgarian).

1963

- [22] Graphs with a completeness operation. *God. Sof. Univ. Phis.-Math. Fac.* **54** (1963), No 1, 127–139 (with N. Martinov, in Bulgarian).
- [23] Axiomatic and automatic verification of block- schemes. *God. Sof. Univ. Phis.-Math. Fac.* **56** (1963), No 1, 158–190 (with E. Dimitrov and V. Spiridonov, in Bulgarian).
- [24] On the best approximation with algebraic polynomials in respect to Hausdorff distance. *God. Sof. Univ. Phis.-Math. Fac.* **56** (1963), No 1, 195–207 (in Bulgarian).
- [25]  $\varepsilon$ -entropy and  $\varepsilon$ -capacity of the set of the monotone functions. *Uspehi math. nauk* **18** (1963), No 2, 155–158 (in Russian).
- [26] Axiomatik der Blokschemata und automatische Programmkontrolle. In: Int. Kolloquium, über aktuelle Probleme der Rechentechnik. II. Dresden, 1962. Vortrage, Dresden, 1963, 61–63.
- [27] Approximation bezüglich einer Hausdorffschen Metrik mittels algebraischer Polynome. In: Int. Kolloquium über aktuelle Probleme der Rechentechnik. II. Dresden, 1962. Vortrage, Dresden, 1963, 121–122.
- [28] Machines helping the human brain. Narodna prosveta, Sofia, 1963 (in Bulgarian).
- [29] Bulgaria is building socialism. *Sp. Mathematica, Sofia* **1** (1963) No 6, 1–3 (in Bulgarian).

1964

- [30] Approximation of functions with algebraic polynomials in respect to a metric of the Hausdorff type. Review of the PhD thesis, Sofia University, 1964.
- [31] On the graphs with a completeness operation. *God. Sof. Univ. Phis.-Math. Fac.* **57**, (1964) 291–305 (with N. Martinov, in Bulgarian).
- [32] Mathematics and computing technic. *God. Sof. Univ. Phis.-Math. Fac.* **57** (1964) 307–316 (in Bulgarian). v
- [33] Entropy of the continuous functions of many variables. *C. R. Acad. Bulgare Sci.* **17** (1964), No 4, 335–337 (with B. Penkov, in Russian).

- [34] On widths of the space of continuous functions. *C. R. Acad. Bulgare Sci.* **17** (1964), No 8, 689–691 (with B. Penkov).
- [35] On a method for approximation of periodic functions with trigonometric polynomials. *Tr. Math. Inst. Hungarian Acad. of Sciences* **9A** (1964) No 3, 491–494. (with G. Freud, in Russian).
- [36] Figures with constant width. *Sp. Mathematics, Sofia* **3** (1964), No 1, 12–15 (in Bulgarian).
- [37] On the theory of graphs. *Sp. Mathematica, Sofia* **3** (1964), No 6, 1–5 (in Bulgarian).

## 1965

- [38] On some linear methods for approximation of periodic functions in respect to the Hausdorff distance. *God. Sof. Univ. Phis.-Math. Fac.* **58** (1965), 107–140 (in Bulgarian).
- [39] Linear methods for approximation of periodic functions in respect to a metric of Hausdorff type. *Dokl. AN SSSR* **160** (1965), No 5, 1023–1025 (in Russian).
- [40] Linear methods for approximating periodic functions with respect to a metric of Hausdorff type. *C. R. Acad. Bulgare Sci.* **18** (1965), No 5, 253–255.
- [41] On an estimate of the approximation of functions with Bernschtein polynomials. *Mathematica, Cluj* **7** (1965) No 1, 145–154.
- [42] Orthogonale Systeme in einigen Klassen von Polynomenfolgen. *Wiss. Z. Hochsch. Architektur Bauwesen, Weimar* **12** (1965), No 5–6, 517–519 (with L. Iliev).
- [43] Contemporary calculating machines. *Sp. Mathematica, Sofia* **4** (1965), No 2, 8–16; No 3, 10–16; No 4, 13–19; No 6, 27–31 (in Bulgarian).
- [44] On some properties of the Hausdorff metric. *Mathematica, Cluj* **7** (1965), No 1, 145–154 (with V. Popov).

## 1966

- [45] On the best approximation in respect to the Hausdorff distance. *God. Sof. Univ. Phis.-Math. Fac.* **59** (1966), 85–103 (in Bulgarian).

- [46] A model of the regulatory mechanism of cellular proliferation. *C. R. Acad. Bulgare Sci.* **19** (1966), No 9, 835–838 (with R. Tzanev).
- [47] A model of the regulatory mechanism of cellular multiplication. *J. Theoret. Biol., New York* **12** (1966), 327–341 (with R. Tzanev).
- [48] Hausdorffsche Metrik und Approximationen. *Numerische Math., Berlin* **9** (1966), 214–226 (with B. Penkov).
- [49] Electronic machines. Technika, Sofia, 1966 (with D. Bogdanov and others, in Bulgarian).
- [50] Mathematical methods for classification. *Sp. Mathematica, Sofia* **5** (1966), No 5, 16–20. (in Bulgarian).

1967

- [51] Approximation of plane point sets with polynomial curves. *God. Sof. Univ. Math. Fac.* **60** (1967), 211–222 (in Bulgarian).
- [52] On the convergence of a sequence of linear positive operators. *God. Sof. Univ. Math. Fac.* **60** (1967), 279–296 (in Bulgarian).
- [53] On P. Korovkin's Theorems for Convergence of Sequences of Linear Positive Operators. *Dokl. AN SSSR* **177** (1967), No 3, 518–520 (in Russian); *Soviet Math. Dokl.* **8** (1967), No 6, 1445–1447.
- [54] On the interpolational process of Fejer. *Izv. Math. Inst. BAS* **9** (1967), 133–145.
- [55] Approximation with stepwise functions with respect to Hausdorff distance. *Math. Zametki* **2** (1967), No 1, 61–67 (in Russian).
- [56] Distance. *Fiz.-math, sp., Sofia* **6** (1967), No 2, 14–17.

1968

- [57] On the numerical calculation of a class of polynomials of best approximation. *God. Sof. Univ. Math. Fac.* **61** (1968), 17–27 (with Sv. Markov, in Bulgarian).
- [58] Modeling of the regulatory mechanism of the cellular proliferation in the liver. *Central. Biochem. Lab. BAS* **3** (1968), 21–35 (with R. Tzanev).

- [59] Approximation with respect to Hausdorff distance. *Math. Zametki* **3** (1968), No 4, 481–494 (in Russian; DSc thesis, Moscow, 1967).
- [60] Computer studies on the mechanism controlling cellular proliferation. In: Effects on radiation on cellular proliferation and differentiation. Vienna, Int. Atomic Energy Agency. 1968, 453–461 (with R. Tzanev).
- [61] Computer simulation of the regenerative processes in the liver. *J. Theoret. Biol., New York* **18** (1968), 90–104 (with R. Tzanev).
- [62] Electronic calculating machines. MNP, Sofia, 1968 (in Bulgarian).

1969

- [63] Convergence of the derivatives of the linear positive operators. *C. R. Acad. Bulgare Sci.* **22** (1969), No 5, 507–509 (in Russian).
- [64] A possible mechanism for cellular differentiation. *C. R. Acad. Bulgare Sci.* **22** (1969), No 12, 1433–1436 (with R. Tzanev).
- [65] On the widths of the space of the continuous functions. *Izv. Math. Inst. BAS* **10** (1969), 5–15 (with B. Penkov, in Bulgarian).
- [66] Certain questions in the theory of approximation of functions and sets in the Hausdorff metric. *Uspehi Mat. Nauk* **24**, (1969), No 5, 143–180 (in Russian); *Russian Math. Surveys* **24** (1968), No 5, 143–183.
- [67] Computer simulation of the regulatory mechanisms of cellular proliferation. *Inform. Processing, Amsterdam* **68** (1969), 1506–1507 (with R. Tzanev).
- [68] A model of cancer studies by a computer. *J. Theoret. Biol., New York* **23** (1969), 124–134 (with R. Tzanev).

1970

- [69] Approximation of functions of more variables with algebraic polynomials in Hausdorff metric. *God. Sof. Univ. Math. Fac.* **63** (1970), 61–76 (with V. Popov, in Russian).
- [70] Approximation of plane curves with polynomial curves. *C. R. Acad. Bulgare Sci.* **23** (1970), No 6, 639–642 (with V. Popov, in Russian).
- [71] On the approximation with spline functions. *C. R. Acad. Bulgare Sci.* **23** (1970), No 7, 755–758 (with V. Popov, in Russian).

- [72] Convergence of the derivatives of the linear positive operators. *Izv. Math. Inst. BAS* **11** (1970), 107–115 (with B. Penkov, in Bulgarian).
- [73] Study of a mathematical model of the regulation of the cellular multiplication. *Izv. Math. Inst. BAS* **11** (1970), 221–246 (with R. Tzanev, in Bulgarian).
- [74] On the classes characterized by the best approximation with the spline functions. *Math. Zametki* **8** (1970), No 2, 137–148 (with V. Popov, in Russian).
- [75] Approximation relative to Hausdorff distance. In: *Approximation Theory* (Ed. A. Talbot), London and New York Acad. Press, 1970, 101–108.
- [76] Prehistoric birth of the computer. *Sp. Kvant, Moskow* (1970), No 7, 3–7; No 10, 8–14 (with N. Rosov, in Russian).

## 1971

- [77] On a Property of a class of Linear Positive Operators. *God. Sof. Univ. Math. Fac. 64* (1971), 115–117 (with B. Bojanov).
- [78] Parametric approximation. *God. Sof. Univ. Math. Fac. 64* (1971), 237–247 (in Bulgarian).
- [79] Possible molecular mechanism for cell differentiation in multicellular organisms. *J. Theoret. Biol., New York* **30** (1971), 337–393 (with R. Tzanev).
- [80] An epigenetic mechanism for carcinogenesis. *Z. Krebsforsch., Berlin* **76** (1971), 299–319 (with R. Tzanev).
- [81] Charls Babbage (1791–1871). In the occasion of 100 years of his death. *Fiz.-math, sp., Sofia* **14** (1971) No 4, 331–339.

## 1972

- [82] A generalization of the estimates for the approximation of functions with linear positive operators. *God. Sof. Univ. Math. Fac. 65* (1972), 191–200 (with V. Popov, in Russian).
- [83] A problem of the labyrinths. *C. R. Acad. Bulgare Sci.* **25** (1972), No 5, 583–585 (with T. Bojanov).

- [84] On the approximation of functions with spline functions and rational functions. Trudi Int. Conf., Varna, 19–25 May 1970, BAS, 1972, 89–94 (with V. Popov, in Russian).
- [85] Analog of the S. M. Nikolskii's theorem for approximation of functions with algebraic polynomials in Hausdorff metric. Trudi Int. Conf., Varna, 19–85 May 1970. BAS, 1972, 95–103 (with V. Popov, in Russian).
- [86] Exact asymptotic of the best approximation with algebraic and trigonometric polynomials in Hausdorff metric. *Mat. sb., Moscow* **89** (1972), No 1, 138–147 (with V. Popov, in Russian).
- [87] Hausdorff Metric and its applications. *Intern. Ser. Numer. Math., Basel-Stuttgart* **20** (1972), 127–146 (with B. Penkov).

## 1973

- [88] Convergence of Vallée-Poussin Sums in Hausdorff Distance. *C. R. Acad. Bulgare Sci.* **26** (1973), No 11, 1431–1432.
- [89] Computer simulation of the regenerative processes in the liver. In: Liver Regeneration, MSS Information Corporation, New York, 1973, 174–188 (with R. Tzanev).
- [90] On a generalization of Jackson's theorem for best approximation. *J. Approx. Theory.* **9** (1973), No 3, 102–111 (with V. Popov).
- [91] Academician Ljubomir Iliev at 60 years. *Fiz.-math, sp., Sofia* **16** (1973) No 4, 1–3 (in Bulgarian).

## 1974

- [92] Order of the best approximation for a class of analytic functions. *C. R. Acad. Bulgare Sci.* **27** (1974), No 12, 1621–1623 (in Russian).
- [93] A method for simultaneous approximate calculation of all positive zeros of an algebraic equation. *Izv. VUZ, Mat.* (1974), No 5, 185–187 (in Bulgarian).
- [94] Approximation of Analytic Functions in Hausdorff Metric. Lecture Notes in Math., Berlin etc., vol. **399**, 1974, 490–500.

- [95] A Mathematical Model of Cellular Differentiation. In: Mathematical Models in Biology and Medicine. Proc. IFIP-TC 4 Work. Conf., Varna, Bulgaria, 6–11 Sept., 1972, Amsterdam, North-Holland, 1974, 81–92 (with R. Tzanev).
- [96] Approximation of Monotone Functions by Monotone Polynomials in Hausdorff's Metric. *Rev. Anal. Numer. Theorie Approxim., Cluj* **3** (1974), No 1, 79–88 (with V. Popov).
- [97] The machine is an amplifier of the human brain. *Sp. September* (1974), No 9, 136–145 (in Bulgarian).
- [98] The mathematics and the contemporary society. *Fiz.-math, sp., Sofia* **17** (1974), 331–339 (in Bulgarian).

## 1975

- [99] On a modification of Goncar's theorem on the rate of rational approximation. *Math. Zameiki* **17** (1975), No 3, 383–390 (in Russian).
- [100] Order of best Hausdorff Polynomial Approximation of Certain Functions. *Serdica* **1** (1975), No 1, 77–78.
- [101] Approximations of Semicircles by Algebraic Polynomials. *Trudy Math., Inst. Steclov* **134** (1975), 315–320; *Trudy Math. Inst. AN SSSR* **134** (1975), 278–282 (in Russian).
- [102] Simultaneous approximation of all real zeroes of an algebraic polynomial. *Intern. Ser. Numer. Math., Basel-Stuttgart* **26** (1975), 131–137.
- [103] Hausdorff Approximation of Functions and Point Sets. In: Topics in Numer. Analysis. Proc. of Royal Irish Acad. Conf. on Numerical Analysis, Dublin 1974. Dublin, Acad. Press, 1975, 175–184.
- [104] Hausdorff Approximation of Functions and Point Sets. *Mathematica Balkanica* **4** (1975), 547–553.
- [105] Computation mathematics old and new. Nauka i izkustvo, Sofia, 1975 (in Bulgarian).
- [106] Babbage Charls. Encyclopedia of Computer Science and Technology vol. 2 Marsel Dekker Inc., New York, 1975, 469–479.
- [107] The problem of talents in universities. In: Problem of talents (Ed. Y. Yanev) Partizdat, Sofia, 1975, 201–207 (in Bulgarian).

- [108] The 60th Anniversary of Professor L. Iliev. In: Math. structures, Comp. Math., Math Modeling, BAS, Sofia, 1975, 5–27.

1976

- [109] Approximation by algebraic polynomials of functions, which are different from zero only in one point. *God. Sof. Univ. Math. and Mech. Fac.* **67** (1976), 61–76 (with N. Kjurkchiev, in Bulgarian).
- [110] Best Hausdorff Approximation with Equidistant-Knot Spline Functions. *C. R. Acad. Bulgare Sci.* **29** (1976), No 12, 1717–1719.
- [111] Hausdorff Derivatives in  $F_{\Delta}$ . *Serdica* **2** (1976), No 2 131–137 (with B. Penkov and others).
- [112] Certain problems of Hausdorff approximation. In: Theory of function approximation, Moscow, vol. **135**, 1976, 322–329 (in Russian).
- [113] Mathematical models of the cellular proliferation and differentiation. *Uspehi Math. Nauk, Moscow* **31** (1976), No 3, 255–256 (in Russian).
- [114] Metrical dimension and approximation of polynomial curves on the plane. *Serdica* **2** (1976), 295–299 (with T. Bojanov).
- [115] Best Hausdorff Approximation with Spline Functions. Colloq. on Functional Analysis and Approx. Budapest, 1976.
- [116] Mathematical models of the processes for cellular proliferation and differentiation. Publ. Moscow University, 1976.
- [117] Mathematical biology. *Fiz.-math, sp., Sofia* **19** (1976), No 1, 47–53.
- [118] Stare i nove w metodach numerrycznych. Panstwowe Wydawnictwo Naukowe, 1976.
- [119] Numerical methods, part I. Publ. Nauka i Izkustvo, Sofia, 1976 (with V. Popov).

1977

- [120] Exact estimate for the best Hausdorff spline approximation. *C. R. Acad. Bulgare Sci.* **30** (1977), No 2, 187–190.
- [121] Convergence of sequences of monotone operators in  $A$ -distance. *C. R. Acad. Bulgare Sci.* **30** (1977), No 5, 657–660.

- [122] Segment Arithmetic and Segment Limit. *C. R. Acad. Bulgare Sci.* 30, (1977), No 7, 955–958.
- [123] Segment Derivatives and Taylor's Formula, *C. R. Acad. Bulgare Sci.* 30, (1977). No 8, 1093–1096.
- [124] Best Hausdorff approximations by spline functions with equidistant knots, Pliska, Sofia, 1, (1977), 79–92.
- [125] Some problems for approximation of point sets on the plane, *Mathematica, Cluj.* (1977) (in Russian).
- [126] Practical mathematical analysis, Spring Conf. Bulgarian Math. Soc., Varna, 1977 (in Bulgarian).
- [127] Some Topics of Segment Analysis, in: Interval Mathematics, Acad. Press, 1977. 203–222.
- [128] Jackson's Type Theorems for One-sided Polynomial Approximation, *C. R. Acad. Bulgare Sci.* **30** (1977), No 11, 1533–1536.
- [129] Universities and university education. *Fiz.-math, sp., Sofia* **20** (1977) No 2, 116–124.

## 1978

- [130] Approximation with monotone operators in  $A$ -distance. In: Linear Spaces and Approximation (Eds P. L. Butzer and B. Sz. Nagy) ISNM 40, Basel, 1978, 335–341.
- [131] Characterization of the  $S$ -derivatives of Lipschitz functions. *Serdica* **4** (1978), 260–266 (with S. P. Tashev and P. Petrushev, in Russian).
- [132] Numerical methods, part II, Publ. Nauka i Izkustvo, Sofia, 1978 (with V. Popov, in Bulgarian).
- [133] Informatique, ordinateurs et education. *Impact: science et societe* **28** (1978), No 3, 287–292.
- [134] Collaboration of European Universities. In: Proc. 28 Pugwach Conference, 1978, 212–213.
- [135] A scientist has to be certainly a manager. *Priroda*, Publ. Nauka, Moscow, (1978), 60–64 (in Russian).

- [136] Informatics and the other sciences. *Fiz.-math, sp., Sofia* **21** (1978) No 1, 41–50.

1979

- [137] On a problem of G. I. Marchuk. *Comp. meth. in the math. phis., Novosibirsk* **4** (1979), 4–10 (in Russian).
- [138] Jackson's type theorems for the best one-sided approximations with trigonometric polynomials and spline functions. *Math. Zametki* **26** (1979), No 5, 791–804 (with A. Andreev and V. Popov, in Russian).
- [139] Some estimates for a numerical solution of a boundary problem for ordinary differential equations of a second order. *C. R. Acad. Bulgare Sci.* **32** (1979), No 5, 1023–1026 (with A. Andreev and V. Popov).
- [140] Hausdorff approximations. Publ. BAS, Sofia, 1979 (in Bulgarian).
- [141] Mathematical analysis I. Publ. Nauka, Moscow, 1979 (with V. Il'in and V. Sadovnichii, in Russian).
- [142] Mathematical analysis 1, Publ. "Nauka i Izkustvo", Sofia, 1979 (with V. Il'in and V. Sadovnichii, in Bulgarian).

1980

- [143] Convergence of the derivatives of the linear operators. In: Constructive function theory, Conf. in Blagoevgrad 1977, Publ. BAS, Sofia, 1980, 131–143 (in Russian).
- [144] On the estimate of the approximation with the Fejer's interpolational polynomial. *C. R. Acad. Bulgare Sci.* **33** (1980), No 11, 1447–1450 (with T. Mills).
- [145] Some Topics of Segment Analysis. In: Interval Mathematics (Ed. L. E. Nickel) Academic Press, 1980, 203–222.

1981

- [146] Hausdorff synthesis of antenna lattices for scanning diagram of orientation. *Electroprom. and priborostr., Sofia* **5** (1981), 203–205 (with N. Kjurkchiev and others, in Bulgarian).

[147] Some principals of mathematical modeling. *Impact of science on society* **31** (1981), No 4, 375–379.

[148] Quelques principes de la modelisation mathematique. *Impact: science et societe* **31** (1981), No 4, 391–395.

## 1982

[149] On the Constants of H. Whitney. *C. R. Acad. Bulgare Sci.* **35** (1982), No 4, 431–434.

[150] A New Proof of the H. Whitney's Theorem. *C. R. Acad. Bulgare Sci.* **35** (1982), No 5, 609–611.

[151] Computation techniques, computer and education. *Impact of science and society* (1982) No 1–2, 153–158 (in Russian).

## 1983

[152] Modified Steklov's function, *C. R. Acad. Bulgare Sci.* **36** (1983), No 3, 315–317 (in Russian).

[153] Convergence of Numerical Methods. In: *Constructive function Theory'81*, Sofia, 1983, 513–518.

[154] Averaged moduli of smoothness. Publ. BAS, Sofia, 1983 (with V. Popov, in Bulgarian).

[155] Academician Ljubomir Iliev in the occasion of his 70 years. *Fiz.-math, sp., Sofia* **29** (1983) No 3, 169–171 (in Bulgarian).

[156] Academician Andrei Nikolaevich Kolmogorov (in the occasion of his 80 years jubilee). *Fiz.-math, sp., Sofia* **29** (1983) No 5, 72–74 (in Bulgarian).

## 1984

[157] On a Theorem of H. Whitney. In: *Constructive function Theory'84*, Sofia, 1984, 808–813.

[158] To Academician L. Iliev's 70th Anniversary. In: *Math. struct., Comput. math., Math. modeling*, BAS, Sofia, 1984, 5–7, 10–12 (in Russian).

[159] Bulgarian Academy of Sciences in 105 years. *Spisanie BAS, Sofia* **20** (1984), No 5, 5–9 (in Bulgarian).

1985

- [160] The Constants of H. Whitney are Bounded. *C. R. Acad. Bulgare Sci.* **38** (1985), No 10, 1299–1302.
- [161] Mathematical analysis. Publ. Moscow University, Moscow, 1985 (with V. Il'in and V. Sadovnichii, in Russian).
- [162] Survey of the parallel computing, Publ. BAS, Sofia, 1985 (with A. Andreev and others, in Bulgarian).
- [163] Information and Knowledge. In: Formal models in Programming, North-Holland, IFIP, 1985, 97–101.
- [164] 115 rocznica powstania Bulgarskiej Akademii Nauk. *Nauka Polska* (1985), No 1–2, 153–158.
- [165] Use of computers in education. *Problems of theory and practice of management, Moscow* (1985). No 4, 57–60 (in Russian).
- [166] Problems of the computer education – the second wave. *Sp. Math. education* **10** (1985), No 1, 2–7 (in Bulgarian).
- [167] Children in the information age. *Sp. Math. education* **10** (1985), No 3, 3–5 (in Bulgarian).
- [168] Information und Wissen. In: Heinz Zemanek – Ein Computerpionier, R. Oldenbourg Wien München, 1985, 91–93.

1986

- [169] On a theorem of H. Whitney. *Dokl. AN SSSR* **291** (1986), No 6, 1296–1300 (in Russian).
- [170] The Theorem of Whitney for Integral Norm. *C. R. Acad. Bulgare Sci.* **39** (1986), No 10, 35–38.
- [171] Children in an Information Age, Tomorrow's Problems Today. In: Children in an Information Age. Pergamon Press, Oxford, 1986, 195–200.
- [172] Informatics and computation technic. *Sp. BAS, Sofia* **32** (1986) No 1, 12–16 (in Bulgarian).
- [173] The computer is man made and has to be his servant. *Sp. Plamak, Sofia* (1986), No 1, 7–12 (in Bulgarian).

- [174] Une education adaptee a l'ere de l'information. *Impact: science et societe* (1986), No 146, 203–212.
- [175] The second wave: Problems of computer and education. In: *Information Technology and Education* (Eds R. Ennals, R. Gwyn, L. Zdravchev), Chichester, Ellis Horwood Limited, 1986, 14–22.

## 1987

- [176] On a Theorem of H. Whitney. *Soviet Math. Dokl.* **34** (1987), No 3, 603–606.
- [177] A Modified Steclov Function. *Amer. Math. Soc. Transl.* **137** (1987), No 2, 57–59.
- [178] On the Theorem and Constants of H. Whitney. *Constr. Approx.* **3** (1987), 1–11.
- [179] On a Theorem of Ju. Brudnyi. *Math. Balkanica* **1** (1987), 106–111.
- [180] *Mathematical analysis 2*, Publ. Moscow University, Moscow, 1987 (with V. Il'in and V. Sadovnichii, in Russian).
- [181] *The Bulgarian Academy of Sciences: Yesterday, Today and Tomorrow, Introducing Research Results into Practice*. Publ. BAS, Sofia, 1987, 26–30.
- [182] *Implementation of the research results of the Academy institutes in the People's Republic of Bulgaria, Introducing Research Results into Practice*. Publ. BAS, Sofia, 1987. 63–68 (with J. Ivanov).
- [183] *Art, science and education*. Acad. of art "Apolonia", Sozopol, 1987, 85–96 (in Bulgarian).
- [184] *School mathematics in the information age*. In: *Informatics and the teaching of mathematics*, North-Holland, IFIP, 1987, 1–4.

## 1988

- [185] *Oncogenes and Genetic Networks*. *Ber. Nat.-Med. Ver. Salzburg* **9** (1988), 183–184 (with R. Tzanev).
- [186] *Averaged moduli of smoothness*. Publ. Mir, Moskow, 1988 (with V. Popov, in Russian).

- [187] The Averaged Moduli of Smoothnes. John Wiley & Sons, New York 1988, (with V. Popov).
- [188] Children in an Information Age. *Education and Computing* **4** (1988), 21–26.
- [189] High School Mathematics Education and Training of Mathematics Teachers in Bulgaria. In: ICME-6, Budapest, Hungary, 1988 (with T. Vitanov and others).
- [190] For the rearrangement of the spiritual sphere. *Sp. BAS, Sofia* **34** (1988), No 6, 6–9 (in Bulgarian).
- [191] Informatics and education. In: 5th Seminar, Problems of informatics and its appliccation in management of education and research, Sofia Univ., Sofia, 1988, 7–15 (in Bulgarian).
- [192] Informatics for peace, Peace is a human value. Publ. BAS, Sofia, 1988 (in Bulgarian).
- [193] Sofia university “Kliment Ohridski” and the Bulgarian science. *Sp. BAS, Sofia* **36** (1988), No 6, 22–26 (in Bulgarian).
- [194] Approximation with least derivative. *C. R. Acad. Bulgare Sci.* **42** (1998), No 1, 27–30 (in Russian).

## 1989

- [195] Approximation splines. *Math. Balkanica* (1989), No 1, 106–121.
- [196] Fractals, Chaos and Approximation. In: Information Processing '89, IF1P, Norlli-Holland, 1989, 589–590.
- [197] Neighborhood graphs on the plane. *Fiz.-math, sp., Sofia* **4** (1989) No 3–4, 281–300 (in Bulgarian).
- [198] Mathematical analysis 2. Publ. Nauka i Izkustvo, Sofia, 1989 (with V. Il'in and V. Sadovnichii, in Bulgarian).
- [199] Information as a Science and as a Tool. In: ICSU Report of 26th Meeting of the General Comm. Lisbon, Portugal, 11–14 Oct. 1989 and Scientific Lectures, 1989, 318–325.
- [200] A Broad View of Informatics. *Higher Education Policy* **2** (1989), No 4, 73–76.

- [201] The Bulgarian Academy of Sciences – Center of Research and Innovation. *Bulgarian Foreign Trade* (1989), No 3, 18–19.
- [202] Marin Drinov (1838–1906) – the first President of BAS. *Sp. BAS, Sofia* **35** (1989). No 1, 5–10 (in Bulgarian).
- [203] Vassil D. Stojanov – principal manager of the Bulgarian Literary Society. *Sp. BAS, Sofia* **35** (1989), No 5, 5–10 (in Bulgarian).
- [204] Bulgarian Academy of Sciences – 120 years of tradition and innovation. *Sp. BAS, Sofia* **35** (1989), No 6, 3–9 (in Bulgarian).
- [205] Mathematical models of some thermophysical processes and devices for molding and crystallization of steel. In: Technology of metals, Conf. High alloy nitrogen steel '89, BAS, Sofia. 1989, 12–18 ( with R. Lazarov and C. Rashedev, in Russian).

## 1990

- [206] To the memory of academician Andrey Petrovich Ershov. *Programming AN SSSR*, (1990), No 1, 124–125 (in Russian).
- [207] For a real rearrangement of the Bulgarian Academy of Sciences. *Sp. BAS, Sofia* **36** (1990), No 2, 5–10 (in Bulgarian).
- [208] Lecture on Science in Bulgaria. In: Annual Reports of ICSU Scientific Bodies, ICSU Secretariat, Paris, 1990, 54–66.
- [209] Hausdorff approximations. Kluwer Acad. Publ., 1990.

## 1991

- [210] Planar Neighborhood Graphs Without Cycles., *C. R. Acad. Bulgare Sci.* **44** (1991), No 4, 23–35.
- [211] Quality of education with the application of new information technologies. In: Images of Programming (Eds D. Bjorner and V. Kotov) North-Holland, IFIP, 1991, 1. 71–1. 78 (with A. Eskenasy).
- [212] The Science Advising Organization in Bulgaria. In: Worldwide Science and Technology Advice, Pergamon Press, 1991, 101–106.
- [213] The Chaos. *Sp. Orpheus, Sofia* (1991), No 1, 6–8 (in Bulgarian).

- [214] Mathematics for biologists. Publ. Kliment Ohridsi, Sofia, 1991 (with R. Maleev and others, in Bulgarian).
- [215] A theorem of Whitney's type in  $R^2$ . *Pliska Studia Math. Bulgar.* **11** (1991), 78–85 (with M. Takev).

## 1992

- [216] The Potential of Information Technologies for International Cooperation. In: Int. Symposium "Expanding Access to Science and Technology, the Roll of Information Technologies", United Nations University, Kyoto, 12–14 May, 1992.
- [217] Data, Information, Knowledge and Wisdom. In: SEARCC'92, XI Conference of the South East Asia Regional Computer Confederation, August 11–14, 1992, Kuala Lumpur, Malaysia, I, 1992, 01. 01–01. 14.
- [218] On a Conjecture of P. Erdős and D. Szekeres. *C. R. Acad. Bulgare Sci.* **45** (1992). No 12. 17–20.
- [219] Human Resources and Education in the Information Era. Congreso Iberoamericano de Informatica Educativa, Santo Domingo, Republica Dominicana. Del 9 al 12 de junio, 1992.
- [220] Recursos humanos y education en la era de la informacion. *Informatica edcativa, Colombia* **5** (1992), No 2, 97–103.
- [221] Bulgarian Academy of Sciences: current changes and outlook. In: Organizational structures of science in Europe, Viena, POSTE, UNESCO, 1992, 233–244.
- [222] Vassil Atanasov Popov (January 14, 1942 – May 31, 1990). Constructive Theory of Functions, Proc. of Int. Conf. Varna, Publ. BAS, Sofia, iii–xiv (with K. G. Ivanov and P. Petrushev).

## 1993

- [223] Optimall disposition of points in the plane with respect to the angles, determined by them. Discreet Mathematics and Applications (Eds K. Chimev and Sl. Shtrakov), Blagoevgrad, (1993), 10–24; *Fiz.-math, sp., Sofia* **34** (1993) No 2, 118–127 (in Bulgarian).
- [224] Personal view on Informatics and Changes in Learning. In: IFIP Conf. Gmunden, 1993.

- [225] Integral Hausdorff Metric. *C. R. Acad. Bulgare Sci.* **46** (1993). No 10, 21–24.
- [226] Some Open Problems in Approximation Theory. In: Proc. Open Problems in Approximation Theory, June 18–24, 1993, Voneshta Voda (Ed. B. Boyanov) SCT Publishing, 1993, 175–179.
- [227] Image Approximation for Data Compression. In: Scientific Computation and Mathematical Modeling (Ed. S. M. Markov) DATECS Publishing, Sofia, 1993, 95–98.
- [228] Integrity of Science and the Challenge of the Information Era. Background paper, Project 2000+, International Forum 5–10 July, 1993.
- [229] Computer Technologies and Telecommunications in the Modern Society. In: Seminario Internacional, Mexico, D. F., Jan. 1993, 1993.
- [230] The 80th Anniversary of Academician Ljubomir Iliev. In: Mathematical Modeling: Methodology, Software Tools and Applications (Ed. E. D. Popova) DATECS Publishing, Sofia, 1993, XV–XXI.
- [231] Angles in a Plane Configuration of Points. *C. R. Acad. Bulgare Sci.* **46** (1993), No 5. 27–30.
- [232] Convergence of Fractal Transform Operators. *C. R. Acad. Bulgare Sci.* **46** (1993). No 12. 13–16.
- [233] Modeling of Images. *Math. Balkanica* **8** (1994), No 1, 85–111.
- [234] Entering the information era. In: The role of applied science and technology for a sustainable society, USP Conv. Center, Sao Paulo, Brazil, 1993, 15–20.
- [235] Plane configurations of points with minimal biggest angle. *Mathematica plus* (1993), 2, 8–13 (in Bulgarian).

1994

- [236] Entrando na Era da Informa ção. Universidade de São Paulo, Estudos Avanc ados 20, 8, (1994), No 20, 28–32.
- [237] Compulsory Configurations of Points in Euclidean Plane. In: Advances in Parallel Algorithms (Eds I. Dimov and O. Tonev) IOS Press, Amsterdam, 1994, 194–201.

- [238] Mathematical Problems in Fractal Image Compression. Mathematics and Education in Mathematics, Proc. XXIII Spring Conf. Union of Bulgarian Mathematicians, Stara Zagora, April 1–4, 1994, Sofia, 1994, 3–53.
- [239] Fractal Analysis, *C. R. Acad. Bulgare Sci.* **47** (1994), No 5, 17–20.
- [240] Orthonormal Fractal Basis. *C. R. Acad. Bulgare Sci.* **47** (1994), No 7, 15–18.
- [241] One Parameter Rotation in a Hilbert Space. *C. R. Acad. Bulgare Sci.* **47** (1994), No 12, 25–28.
- [242] Orthogonal basis of fractal functions and image compression. *God. Sofia Univ., Fac. Math. and Inform.* **34** (1994), No 3, 411–432 (in Bulgarian).
- [243] Fractal Approximations for Image Compression. in: *Mathematical Research, Volume 81, Pursella '94*, Akademie Verlag, 1994, 63–72.
- [244] Approximation and Interpolation Theory. In: *Handbook of Numerical Analysis* (Eds P. G. Ciarlet and J. L. Lions) 1994, 223–462 (with A. Andreev).
- [245] Numerical Solution of Polynomial Equations. In: *Handbook of Numerical Analysis* (Eds P. G. Ciarlet and J. L. Lions) 1994, 625–778 (with A. Andreev and N. Kjurkchiev).

## 1995

- [246] Minimax of the Angles in a plane configuration of points. *Acta Math. Hungar* **69** (1995), No 1–2, 27–46.
- [247] On the critical points of a polynomial. *East J. on Approx.* **1** (1995), No 2, 255–258.
- [248] Compulsory configurations of points on the plane. *Fundam. and Applied Math.* **1** (1995), No 2, 491–516.
- [249] Academy of Sciences in Emerging Democracies. In: *Beyond Government, Extending the Public Policy Debate in Emerging Democracies* (Eds C. D. Goodwin and M. Nacht) Westview Press, Boulder, San Francisco, Oxford, 1995, 333–348.

1996

- [250] Mathematical Modeling of Real World Images. *Constr. Approx.* **12** (1996), 31–65.
- [251] Numerical methods, part I (second edition). Publ. Sv. Kl. Ohridski, Sofia, 1996.

1997

- [274] The temporary dimensions of mathematics. *Spis. Bulg. Acad. of Sci.* **1** 2001, 43–48 (in Bulgarian).

## 2002

- [275] Adapted Multiresolution Analysis and Wavelets. In: Alexits memorial conference in honor of the 100-th anniversary of the birth of Professor Georg Alexits (1899–1978) (Eds L. Leindler, F. Schipp and J. Szabados) Budapest, Hungary, August 9–13, 1999. Budapest: Janos Bolyai Math. Society Mathematical Studies, Functions, series, operators, 2002, p. 23–38.
- [276] On the Hausdorff Geometry of Polynomials, a Generalised Conjecture. Ukrainian mathematical congress 2001, Kiev, Ukraine, August 21–23, 2001. Proceedings, Section 10. Approximation theory and harmonic analysis. Inst. Mat. NAN Ukrainy, 2002, 194–207.
- [277] On the Hausdorff Geometry of Polynomials. Discrete Mathematics and Applications (Eds Sl. Shtrakov et al.). Proceedings of the 6-th international conference, Bansko, Bulgaria, Aug. 31–Sept. 2, 2001. Blagoevgrad: South-West University Res. Math. Comput. Sci., 2002, 1–12.
- [278] Generalization of a Conjecture in the Geometry of Polynomials. *Serdica Math. J.* **28** (2002), 283–304.

## 2003

- [279] Min Value Problems for Complex Polynomials. *C. R. Acad. Bulgare Sci.* **56** (2003), No 12, 5–10. (with N. Nikolov)
- [280] John Atanasoff, The Electronic Prometheus. St. Kliment Ohridski University Press, Sofia, 2003.
- [281] Min Problems for Algebraic Polynomials. *East Journal on Approximation* **9** (2003), No 4, 427–442 (with N. Nikolov).
- [282] Variations of Smale’s Mean Value Conjecture. *C. R. Acad. Bulgare Sci.* **56** (2003), No 11, 9–14 (with N. Nikolov).

## 2004

- [283] Thoughts over the Smale’s mean value conjecture. Approximation Theory. A volume dedicated to Borislav Bojanov. Marin Drinov Akademik Publishing House, Sofia, 2004, pp. 225–232.
- [284] Hausdorff distance and image processing. *Russian Math. Surveys* **59** (2004), No 2, 319–328. Translated from *Uspehi Math. Nauk* **59**(2004), No 2, 127–136.

## 2005

- [285] Extremal problems for algebraic polynomials. *Russ Math* **60** (2005), No 6, 1183–1194.
- [286] Extremal problems for algebraic polynomials. *Uspehi Math. Nauk* **60** (2005), No 6(366), 175–186 (in Russian).
- [287] On the Normed Linear space of Hausdorff continuous functions. Springer, Lecture Notes in Computer Science vol. **3743** (2005), 281–288 (with R. Angelov and Sv. Markov)

## 2006

- [288] John Atanasoff, The Electronic Prometheus. *Inform. Proc. Soc. of Japan, Magazine* **47** (2006), No 1. 1–7.
- [289] On the Mean Value Conjectures of Smale and Tischler. *East J. on Approx.* **12**, (2006), No 3, 353–366 (with P. Marinov).
- [290] *The set of Hausdorff Continuous Functions – The Largest Linear Space of Interval Functions*. *Reliable Computing* **12** (2006), 337–363 (with R. Angelov and Sv. Markov).
- [291] Algebraic operations on the space of Hausdorff continuous functions. In: *Constructive Theory of Functions* (Ed. B. D. Bojanov) Varna 2005, Prof. Marin Drinov Academic Publ. House (2006), 35–44 (with R. Angelov and Sv. Markov).

## 2007

- [292] Verification of the Smale’s Mean Value Conjecture for  $n \leq 10$ . *C. R. Acad. Bulgare Sci.* **60** (2007), No. 11, 1151–1156 (with P. Marinov).
- [293] Complex Analogues of the Rolle’s Theorem. *Serdica Math. J.* **33** (2007), No 4, 387–398.
