**Report on:**

**”The Wolfram Functions Site”**  
**functions.wolfram.com**

**by Oleg Marichev §**

Dear colleagues and readers,

I invite you to visit the new version of the Wolfram Functions Site, with more than 307 409 formulas:

<http://functions.wolfram.com/>

We have added particular cases of the hypergeometric functions, introductions to many groups of functions, rule forms for formulas, a lot of new formulas in different areas. The site reflects also some new functions, that *Mathematica 6.0* has.

This version of site was built with the help of new building programm, which allows to update the site very often.
