

**STRICT L^p SOLUTIONS
FOR FRACTIONAL EVOLUTION EQUATIONS**

Emilia Bazhlekova

Dedicated to the 60th anniversary of Prof. Francesco Mainardi

Abstract

The abstract linear problem for the fractional differential equation of order $\alpha \in (0, 1)$ is studied. Using the resolvent approach, strict L^p solvability is proved provided the initial data belongs to appropriate real interpolation spaces.

Mathematics Subject Classification: 26A33, 45N05

Key Words and Phrases: fractional derivative, fractional evolution equation, real interpolation space
