

ON LINEAR AND NONLINEAR INTEGRAL EQUATIONS ON FINITE INTERVALS

O. V. Doubrovina and S. V. Rogosin

Dedicated to the 60th birthday of Prof. F. Mainardi

Abstract

We consider one-dimensional integral operators on a finite interval, in particular with kernels depending on the difference of arguments. Mapping properties of such operators are obtained in the case of certain pairs of functional spaces.

A survey of recent results in the area is presented too.
