

**A CLASS OF BESSEL SUMMATION FORMULAS  
AND ASSOCIATED OPERATIONAL METHODS**

**G. Dattoli <sup>1</sup>, M. Migliorati <sup>2</sup> and H.M. Srivastava <sup>3</sup>**

**Abstract**

By employing certain operational methods, the authors derive several classes of generating functions for the familiar Bessel function and for its recent generalizations. Some closely-related summation formulas and operational identities, which involve various families of Bessel functions and Hermite polynomials, are also considered.

*2000 Mathematics Subject Classification:* Primary 33C10, 33C45; Secondary 44A10

*Key Words and Phrases:* Bessel and related functions, summation formulas, generating functions, Hermite-Kampé de Fériet polynomials, Gould-Hopper polynomials, exponential polynomials
